

clean vehicle assistance program

Get a **CHARGING
Grant** from

If you purchase a plug-in hybrid or battery electric vehicle through the **Clean Vehicle Assistance Program (CVA Program)** you will also be eligible for a charging grant up to \$2000 in value through our partners at **GRID Alternatives**, a nonprofit, community-based organization that is working to make renewable energy accessible to all communities.

GRID Alternatives' multilingual staff can evaluate your home to see if you can install a dedicated home charger or if your home parking situation requires an alternative charging solution.

GRID Alternatives can also determine if you qualify for the **Energy for All Program**, which is funded by the State of California, and provides a solar electric system at no cost to income-qualified homeowners. Qualified families can pair their EV with solar for more savings, and the ability to charge your EV on sunshine! For more information, please visit energyforallprogram.org.

beneficial state foundation

CHARGING GRANT PROCESS

AFTER YOU GET AN ELIGIBLE VEHICLE, GRID ALTERNATIVES WILL EMAIL YOU IN ABOUT 30 DAYS TO CONFIRM YOUR ELIGIBILITY FOR A CHARGING GRANT.

If you do not receive a confirmation email in 45 days after your vehicle purchase or lease, please email the CVA Program at cleanvehicles@beneficialstate.org.

Option 1

Home EV Charger Installation

- A.** GRID Alternatives or a licensed contractor can evaluate your residence to see if it meets the parking and electrical requirements for installing a home charger with up to \$2000 in eligible funding.
- B.** If GRID Alternatives has a partner installer in your area who can make an estimate, GRID Alternatives can apply the \$2000 funding directly to the contractor.
- C.** Already have a trusted local electrician? If no GRID Alternatives partner installer is currently available or if you would prefer to work with your own EVITP and C-10 certified installer, you may apply to work with them directly and submit for reimbursement after installation.

OR

Option 2

Charge Card Package

The Clean Vehicle Assistance Program has partnered with **EVGo** to allow you to register for a \$1000 prepaid charging credit valid at any public EVGo and ChargePoint stations.

This option also comes with a FREE portable EV charger for use at compatible outlets at home, work, or alternative locations.
